

**BESPOKE  
FORGED**

be·spoke

**“Made-to-Order”**

When so much intention has been devoted to the design of your home, your garage should not be neglected. Let us partner with you to elevate this space to an unexpected level of luxury, custom-designed just for you.

**BESPOKE FORGED**  
CARRIAGE GARAGE  
DOORS

## A Design Collaboration

Christopher Architecture and Interiors has created show-stopping, tailor-made carriage garage door designs that are only available through our collaboration with a local welding company. Our designs add a level of luxury to an often overlooked space in a home: the garage.

Custom-designed carriage doors add a distinguished level of uniqueness.

## Carriage Garage Doors

With side hinges our doors are out-swinging and function like a front door, but on a grander scale. They provide advantages over traditional overhead doors, like a streamlined interior without overhead tracks. The custom garage doors are close fitting, can include standard handles and locks, and are sealed from weather.

Contact us to get started.

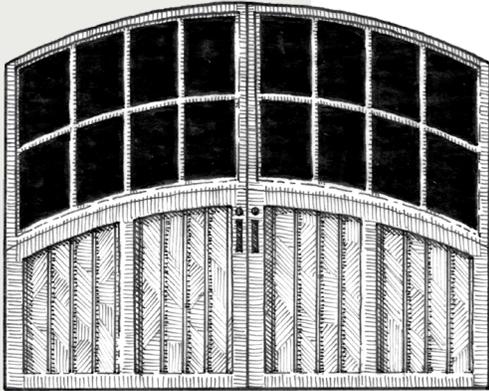

## OUR DESIGNS

**Custom-Designed & Hand-Crafted**  
an elegant design solution

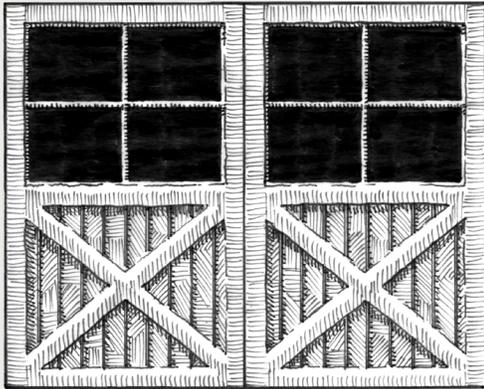

Choose from eight unique designs or we can work with you to design doors that are one-of-a-kind and complement your home's architectural style.

Our designs are offered in four standard sizes: 9' x 7'; 9' x 8'; 10' x 7'; and 10' x 8'. Should your opening not conform to one of these sizes, our designers can create something custom.

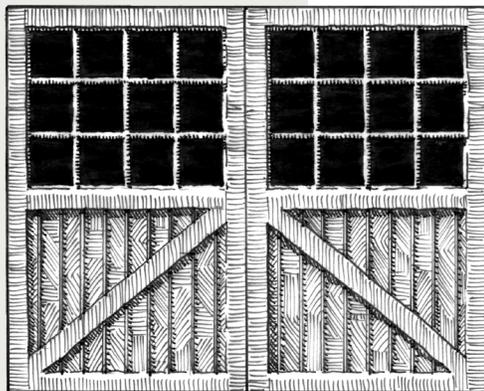

### The Arch

Without ascribing to a particular architectural style, these doors can complement any home while drawing on the original carriage-door designs that helped define the horse-and-buggy era.

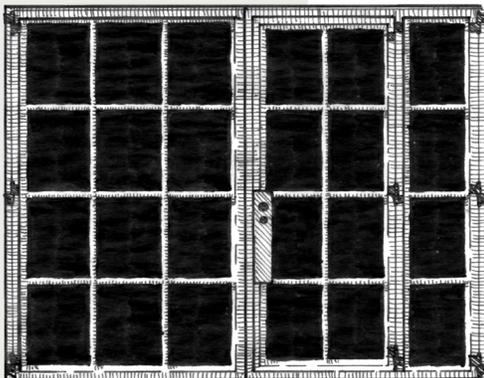

### The Cahaba

This design follows the Craftsman-style architecture inspired by the early 19th-century movement to revive handicrafts. Elements include natural materials: wood, stone, and brick; a dominant fireplace and large chimney; porches with thick square columns and stone supports; and low roofs with wide eaves.

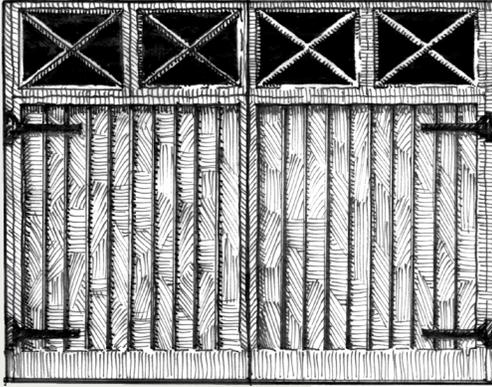

### The Sterrett

A design that will elevate the look of a home with a farmhouse architectural style. Aptly named for houses first built on farms, this style usually boasts board-and-batten siding, either vertical or horizontal, shaker-style cabinetry, exposed reclaimed beams, wide plank floors, deep front porches, and metal roofs.

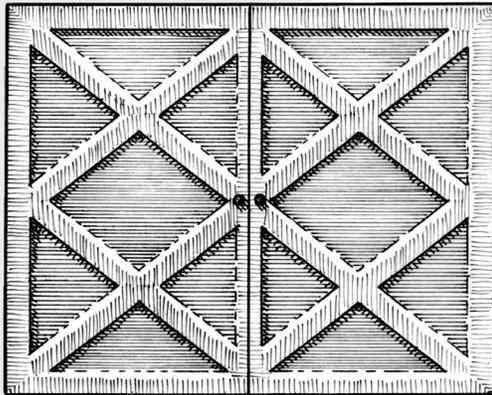

### The Shelby

A modern style that showcases simplified form and clean lines, functionality and openness, generous use of glass, lack of ornament, emphasis of rectangular forms and horizontal and vertical lines.

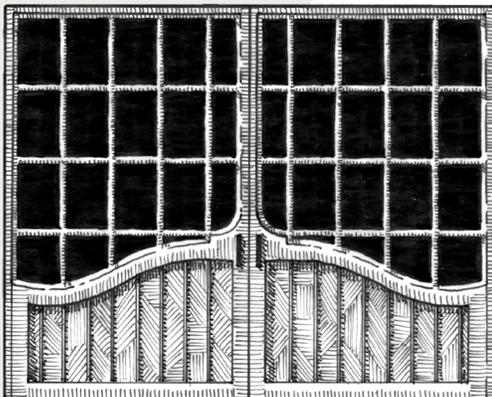

### The Neill

Ranch architecture combines modernist styles with American West ideas of wide-open spaces. A long, close-to-the-ground profile and an open layout are key characteristics of this style.

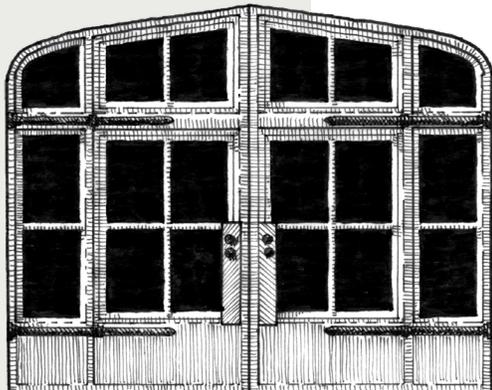

### The Independence

For the discerning home owner who would prefer the security of a solid door, this design is entirely aluminum with no glass.

### The Jefferson

It's a timeless style that exemplifies elegance and comfort. Traditional styling is perfect for those who love antiques, classic art pieces, symmetry and other design elements that are rich with history. Traditional design prides itself on its harmony, order and friendly charm.

### The Chelsea

This style represents the embellished doorways and half-timbering that are easily recognizable in Tudor-style homes. Tudor architecture is an English style that developed in the 15th century. Steeply-pitched gabled rooflines, groupings of windows, and an emphasis on vertical lines are traits of this architectural style.

# MAN-DOOR

OPTIONAL  
FEATURE

Within the design you choose is an optional feature that sets Bespoke Forged apart from other garage door companies. A door within a door, our “man door” functions as a point of entry without having to open the entire unit. A brilliant pedestrian detail, this amenity simplifies your coming and going.

## MATCHING WINDOWS & ENTRY DOORS

We can take your home design a step further with matching entry doors and windows. Elevate your space to an unexpected level of luxury, custom-deisgned just for you.

## An Elegant Design Solution for Luxury Living

Custom-designed and handmade carriage-style doors that swing out to open.
